MAY 2016

## AK893 GAUZY AGENT GLASS COAT

6.50€

High quality product developed to enhance, repair, and achieve extremely realistic, transparent, glass-like smooth finishes on clear plastic parts. Simply dip and let dry for a few minutes. Clean excess around the edges to achieve a uniform layer. For best results, allow product to dry in a dust-free environment. This product, when applied to clear plastic, will result in a realistic glass-like smooth appearance on parts like clear plastic cockpit canopies or other clear parts.

Dip the piece for a few seconds making sure the liquid reaches all crevices.

Take out the piece letting it drain and making sure there are no bubbles.

Dry the excess leaning it over a paper cloth or similar making sure the product does not accumulate too much in one area.

### Notes:

The drying time may vary depending on environmental Conditions. Although it can be manipulated after 30 minutes it is advisable to let it dry for several hours. A good planning of your work and avoiding rushing will help.

Keep in mind that when drying, the product has good adhesion and the piece can get stuck while we let it dry. So it is advisable to move it from time to time during the first minutes of drying or leave it to dry on a place where the bearing surface is as small as possible.

## AK894 INTERMEDIATE GAUZY AGENT SHINE ENHANCER

5.95€

High quality product to create a protective and very realistic glossy sheen on areas where applied. This product also serves as a protective layer for the paint underneath. Apply it the way you would with any varnish. Apply and let dry for a few minutes. This product can also serve as a perfect smooth finishing touch for metallic paints and others such as AK Interactive Xtreme Metal. Apply Gauzy Agent to any single part or sections of your model that are begging for an incredible transparent and smooth shine. With self-leveling properties, it can be applied by brush or airbrush.

## AK892 STAINLESS STEEL SHAKERS

4.20€

Stainless steel balls to use with all kind of modeling products even the more aggressive products. Also with enamel paints, primers, and acrylics. Add to your jar and shake, to help mix your paint quicker. Contains 250 stainless steel balls, at a very low price.

**MC-802 GERMAN MODERN VEHICLES COLORS SET**

**14.00€**

This six color set contains the standard NATO colors to paint German vehicles (and other NATO troops deployed worldwide). Also includes the three colors of the Bundeswehr camouflage in desert theaters.

The colors within this set are true to the actual color with a little modification for scale effect.

These acrylic paints are formulated for airbrush although they can be used with brush too, and they are soluble in water

These acrylic paints are formulated by MENG and AK-Interactive under the most exact parameters. We recommend MENG thinner for use with this product.

This set contains:

- MC-221 NATO Black / MC-222 NATO Green / MC-223 NATO Brown / MC-224 German Sand Brown /
- MC-225 German Sand Beige / MC-226 German Grey Beige

**MC-804 WWI VEHICLES CAMOUFLAGE COLORS VOL. 1**

14.00€
