AK507 METALLICS VOL. 1
AK LEARNING SERIES 4

9.95€

English. 84 pages.

Metallics have always been a difficult task for modellers. It doesn't matter which modelling branch you choose, at some point you will find yourself in front of a metal piece/part which, of course, you want to finish as realistic as possible.

There exist many ways to achieve a metal finish, from the use of enamels, towards waxes and bare metal sheets. Inside these two volumes dedicated to metallics, the talented artists from the AK Learning Series take you on a journey through the difficult tasks of mastering metallics.

In this first volume we will show you how to understand metallic paints and how to apply them properly with the right products. Also we cover techniques and share tips which come in handy when you are stuck. We will see examples applied on aircrafts, engines, vehicles, afv's and details on all kinds of models.

The new release in the well know AK Learning Series, is focussed on metallics. In this 4th issue in this series we share many tricks, information, techniques, and instructional material for beginners and advanced modellers. Coming soon Vol. 2.

**AK667 LEXINGTON'S FINAL BATTLE
MODELLING FULL AHEAD SPECIAL 1**

15.95€

English / Spanish. 76 pages

When we decided to launch the Modelling Full Ahead project, we were aware that in an eighty page publication it was possible to condense the information needed to build a specific warship. But as modelling is evolving nowadays with it's curiosity, techniques, innovation, history, and certainly everything that pushes us to build a scale model, this cannot only be achieved with a monographic series.

Baring this in mind and in response to the multitude of suggestions we received, we offer you a parallel to the monographs series. In this special issue we will deal with difficulties that may occur to you during the building stages , such as working with photo-etch, advanced painting, scratch-building, diorama composition, etc.

With this new guide we will not only help you to build your models but also have the possibility to tell its history.

This impressive book we show the work of master modeller Marijn Van Gils, with real pictures, history and step by step process how he fully detailed in the 1/700 Lexington kit. A very special and limited edition parallel to the Modelling Full Ahead naval series.

AK307 EXTREME REALITY

23.95€

English. 136 pages.

Realism is usually the goal that we as modellers always want to achieve. It becomes challenging as we have to bear in mind the many details we must add, but these small details are key to give our model its realistic appearance. Extreme Reality shows how this realism can be achieved in scale modelling. Follow the talented artists through a journey from a model to real life. Divided in step-by-step articles showing you well known techniques to some or specific techniques only used on a specific model. They will show you how a bulldozer can be as extracted from the scrap yard or a bicycle abandoned somewhere in the countryside. Extreme Reality is a book of masterpieces and it is mean for all of us who enjoy and love this great hobby.

A very instructional and wonderful book made to inspire, teach and for the joy of modelling. With the most impressive models based upon real objects and full step by step guides from the best master modellers of the world.
